

MULTI-POINT SURFACE USE AND OPERATIONS PLAN

JAMES RANCH UNIT #13

Surface Location: 1440' FNL & 860' FWL Sec. 6 T23S, R31E DEC 11 1977

Bottom Hole Location: 1787' FSL & 860' FWL Sec. 31 T22S, R31E OIL & GAS

Eddy County, New Mexico

U.S. GEOLOGICAL
SURVEY
ROSWELL, N.M.

This plan is submitted with the Application for Permit to Drill the above described well. The purpose of the plan is to describe the location of the proposed well, the proposed construction, activities, and operations plan, the magnitude of necessary surface disturbance involved, and the procedures to rehabilitate the surface after completion of operations so that an appraisal can be made on environmental effects.

1. Existing roads including location of exit from main highway Exhibit "A" are portions of maps showing existing road. Go west from Jal, New Mexico on Hwy. 128 for approximately 47 miles (10 miles east of Hwy. 31 North's intersection with 128). Turn north onto paved road for $\frac{1}{4}$ mile. Location is $\frac{1}{2}$ mile due east.
2. Planned access road Exhibit "A" & "B" show the planned access road into the location. This road will be approximately 250'. The road will be constructed of watered and compacted caliche. There are no gates, culverts or cattle guards anticipated.
3. Location of existing wells Exhibit "B" shows the surrounding existing wells.
4. Location of tank battery and flow lines If a commercial well is obtained production facilities will be located on the well pad. Refer to Exhibit
