Re: Moore Federal Com #1-K
1650' FSL and 1650' FWL
Sec 35, T24S, R26E

Gentlemen:

Since approval of Form C-101 for the subject well on March 4, 1976, several legal problems have prevented Mesa from commencement of drilling operations. It now appears that the lease problems have been cleared.

Moranco has been contracted to drill this well but can not spud until early July due to previous commitments. Form C-101 expires June 4, 1976. It is requested that Form C-101 be extended to August 1, 1976. No other changes are anticipated.

Sincerely,

Michael P. Houston
