

Lease Terms ContinuedSec. 10

"Under the provisions of Public Law 97-78, this lease includes all deposits of nongaseous hydrocarbon substances other than coal, oil shale, or gilsonite (including all vein-type solid hydrocarbons). Development by methods not conventionally used for oil and gas extraction such as fire flooding and including surface mining will require the lessee to submit a plan of operations and will be subject to regulations governing development by such methods when those rules are issued by the Bureau of Land Management (BLM), the Minerals Management Service (MMS), and the rules of procedures of the surface managing agency, if other than BLM. Development may proceed only if the plan of operations is approved."
