

ADDITIONAL STIPULATION

The lessee agrees that:

1. Drilling operations will not be conducted within 100 yds. of any cave entrance or known passageway or other subterranean aspect.
2. No "sludge" oil disposal pits will be located within 200 yards of known surveyed cave entrances or underground passageways, or in other locations (as determined by the BLM) where the cave resources will be endangered by seeping oil or waste products. Such pits will not be located in sink holes, near fractures or cave entrances; all pits will be lined with an impervious material.
3. No drilling sites will be cleared in such a manner as to increase natural flow of water into a cave entrance or cave aspect.
