Connection Study for  
Phillips James "A" Lease  
Eddy County, New Mexico

E. C. Wiszneaukas  
Odessa E & P

For your information we have determined connection of the Phillips James "A", located 2-21-30, and James "C", located 11-22-30, Eddy County, New Mexico to a P66NGC gas gathering system is not economical at this time. We will continue to monitor gas development in this area for possible future connection.

Past efforts to expand our low pressure gathering system into this area were also unsuccessful due to insufficient gas reserves from other producers. We do not see the probability for a significant enough increase in available reserves in the near future which would justify such an expansion.

A handwritten signature in cursive script that reads "Augustin Gutierrez".
