Mr. William J. LeMay, Director
New Mexico Department of Energy
Oil and Gas Conservation Division
P. O. Box 2088
Santa Fe, New Mexico 87501

Dear Bill:

I appreciate you and Vic Lyons taking the time to visit with Barbara Price-Thurman, Clayton Taylor, and myself on the ninth. Pursuant to our conversation, I would like to update you on the status of taking in the gas from our James A No. 2 Well in the Cabin Lake Field.

We have moved a compressor from another facility to the James A Well and anticipate having this connected by the first of October. Any further consideration that you can give us on our request for a temporary flaring permit will be appreciated.

Sincerely,

W. B. Berry
Operations Manager
Permian Basin Region
