RECEIVED

We are requesting additional time to re-enter and rework the above well.

It is the intent of the operator to move to this well after completing the re-entry of the 2-24, located in the same section.

We feel that we must establish additional production in this area to warrant costs of pipeline, amine plant and production equipment to justify the costs.

The reasons for the delay in commencing the above operations are set forth on the attached sheet.

Should further data or question need to be answered, please contact David Conn, (307) 678-0227.
