Re: Desert Rose Federal #1
Commingling Order PC-781

Gentlemen:

Enclosed please find a copy of the Sundry Notice which indicates that the Strawn and Morrow formations commenced production on July 5, 1991 with surface commingling, pursuant to the captioned order. Said well was shut-in July 23, 1991, with production scheduled to start again on October 1, 1991.

The Manual for the Installation and Operation of Commingling Facilities states that the production from each pool may be determined from well tests conducted periodically as the Commission may prescribe in the order authorizing the commingling. However, the captioned order does not state how often the tests must be done.

Please advise how often these production tests are required. Your assistance is appreciated.

Yours very truly,

YATES ENERGY CORPORATION
