

H. All trash and debris will be buried or removed from the wellsite within 30 days after finishing drilling and/or completion operations.

8. ANCILLARY FACILITIES:

A. None Required.

9. WELLSITE LAYOUT:

A. Exhibit "D" shows the dimensions of the well pad and reserve pits. The pad and pit area has been staked and flagged (400 X 400).

B. Mat Size: 120 X 175, including waste and reserve pits.

C. Cut and Fill: Minor leveling of the Mat will be required.

D. The surface will be topped with compacted caliche if necessary and the reserve pit will be plastic lined.

10. PLANS FOR RESTORATION OF THE SURFACE:

A. After completion of drilling and/or completion operations all equipment and other materials not needed for operations will be removed. Pits will be filled and the location cleaned of all trash and junk to leave the wellsite in an aesthetically pleasing a condition as possible.

B. Any unguarded pits containing fluids will be fenced until they are filled.

C. If the proposed well is non-productive, all rehabilitation and/or vegetation requirements of the Bureau of Land Management will be accomplished as expeditiously as possible. All pits will be filled and leveled within 90 days after abandonment.

11. OTHER INFORMATION:

A. Topography: The proposed location is on a relatively level but slightly hummocky area.

B. Soil: The topsoil at the proposed drillsite is sandy loam.

C. Flora and Fauna: The vegetative cover consists of sparse mesquite hummocks with little or no grass. Wildlife in the area is typical of semi-arid desert land.

D. Ponds and Streams: None

E. Residences and Other Structures: None

F. Land Use: Cattle grazing.
