

Multi Point Surface Use and Operations Plan
OXY USA Inc.'s Federal AK #1

Page 4

D. The pad and pit area have been staked and flagged.

10. Plans for Restoration of the Surface

- A. After completion of drilling and/or completion operations, all equipment and other materials not needed for operations will be removed. Pits will be filled and location cleaned of all trash and junk to leave the well site in as aesthetically pleasing condition as possible.
- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. After abandonment of the well, surface restoration will be in accordance with the land owner. This will be accomplished as expeditiously as possible. Barring unforeseen problems, all pits will be filled and leveled within 90 days after abandonment.

11. Other Information

- A. Topography: The location is flat featureless plain gently sloping to the south at about 30 feet/mile. GL elevation is 4336.2'.
- B. Soil: Sandy clay loams.
- C. Flora and Fauna: The vegetative cover is generally sparse consisting of mesquite, yucca, shinnery oak, sandsage and perennial native range grasses. Wildlife in the area is also sparse consisting of coyotes, rabbits, rodents, reptiles, dove and quail.
- D. Ponds and Streams: There are no rivers, streams, lakes or ponds in the area.
- E. Residences and Other Structures: The nearest occupied dwelling is the Ward Ranch approximately 3.5 miles north of the location in Section 14, T-23-S, R-23-E, Eddy County, New Mexico.
- F. Archaeological, Historical and Cultural Sites: None observed in the area. Dr. J. Loring Haskell has been engaged to make an archaeological reconnaissance of the work area and access road.
- G. Land Use: Cattle ranching and hunting in season.
