

#### 1. EXISTING ROADS:

A. Exhibit "A" is a portion of a road map showing the location of the proposed well as staked. Point "A" on the plat is on State highway 31 at Milepost 6.25, approximately 6 miles east-northeast of Loving, New Mexico, where a caliche road goes southeast. To go to the proposed well site from this point, exit State 31 onto the caliche road and go 0.7 mile, also see Exhibits "B" and "D", to where a caliche road goes north. Turn north and go 0.9 mile and the well location will be on the west side of the road at a distance of about 50 feet.

B. Exhibit "B" shows existing pertinent roads in the vicinity of the proposed well site. Existing roads are color coded.

#### 2. PLANNED ACCESS ROAD:

A. Existing roads will be used for access. The proposed well site is about 50 feet from an existing road so no new road will be required. A short portion of the existing road will be spot repaired as necessary. The route from State highway 31 to the proposed well site is shown on Exhibits "B" and "D".

#### 3. LOCATION OF EXISTING WELLS:

A. Existing wells in the immediate area are shown on Exhibit "B".

#### 4. LOCATION OF EXISTING AND/OR PROPOSED FACILITIES:

A. Necessary production facilities for this well will be located on the well pad.

#### 5. LOCATION AND TYPE OF WATER SUPPLY:

A. It is not contemplated that a water well will be drilled. Water necessary for drilling operations will be purchased and trucked to the well site, or will be moved to the well site by temporary pipeline laid on the ground alongside existing roads.
