

11. OTHER INFORMATION:

- A. Topography: Land surface is marked by a series of low ridges and interdunal areas which slope to the southwest. Enron's location is located on the shoulder of a low ridge system due west of the Pecos River.
- B. Soil: Soils made up of loose sand & sandy clay loams are overlain by clay and sand separates with scatters of caliche gravels and cobbles.
- C. Flora & Fauna: Vegetation primarily consists of creosote bush, all thorn, broom snakeweed, poverty threawn, mesquite, and various other grasses native to the area. Wildlife in the area is that typical of semi-arid desert land and includes coyotes, rabbits, rodents, reptiles and some birds.
- D. Ponds & Streams: The Pecos River flows just Northeast of the proposed location. There are no other streams, lakes or ponds in the area.
- E. Residences & other structures: None
- F. Archaeological, Historical & Cultural Sites:

NMAS 5853 is situated within 1500' of the proposed road.

NMAS 5863 is situated within the surveyed tract (see NMAS 1990-06-AT).

A category 1 Site, NMAS 5863 (task locus), lies on the west-facing shoulder of a ridge system whose crest is to the east.

12. OPERATOR'S REPRESENTATIVE:

The field representative responsible for assuring compliance with the approved surface use and operations plan is as follows:

Mr. John R. Frick
3406 Meadowridge Lane
Midland, Texas 79701

Phones: Business: (915) 686-3725
Home: (915) 694-4323
