## 8. ANCILLARY FACILITIES

A. None required.

## 9. WELLSITE LAYOUT

- A. Exhibit C shows the dimensions of the well pad and reserve pit area, and the location of the major rig components. The drilling contractor has not been selected and the pad will be no larger than that shown. A new rig plat will be submitted as a sundry notice if needed.
- B. The ground surface of the drilling location is sloping down slightly toward the west. No cut will be required to level the pad area, which will be covered with at least 4 to 6 inches of compacted caliche.
- C. The reserve pits will be steel tanks.
- D. The 200' x 300' pad and pit area will be staked and flagged.
- 10. PLANS FOR RESTORATION OF THE SURFACE
  - A. After finishing drilling and/or completion operations, all equipment and other material not needed for further operations will be removed. The location will be cleared of all trash and junk, to leave the wellsite in as aesthetically pleasing a condition as possible.
  - B. Unguarded pits, if any, containing fluids will be fenced until they have been filled.
  - C. If the proposed well is non-productive, all rehabilitation and/or vegetation requirements of the Bureau of Land Management will be complied with and will be accomplished as expeditiously as possible.

## 11. OTHER INFORMATION

- A. Topography: The proposed location and road will be situated on a gently sloping area situated on the Cavern City Airport grounds. Surficial deposits, dominated by the clay and silt separates, are made up of compacted silt loams, silty clay loams and clay loams. Drainage is by sheetwash with runoff being to the east. Ground elevation is 3279.8'.
- B. Soil: The top soil at the wellsite is composed of typic calciorthid subgroups. Limestone cobbles and gravels are present on a recurrent basis.
- C. Flora & Fauna: The vegetation cover at the wellsite consists of American tarbrush, creosote brush, soaptree yucca, purple prickly pear, Englemann prickly pear, mountain pepper plant, desert holly, broom snakeweed tobos, borrograss, bush muhly, fluff grass and poverty threeawn. Wildlife in the area is typical of a semi-arid climate, consisting of coyotes, rabbits, reptiles, dove and quail. The location is inside the confines of the Airport fence.
