13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work.)*
give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

September 22, 1991: Approximately 5 barrels of oil was run out on the ground when one tank overflowed due to an unexpected dramatic increase in production. A vacuum truck was immediately deployed to pick up as much of the oil as possible. All oil remaining on ground was immediately covered with dirt. The spill was contained within the area of the drill pad. The incident was reported to the BLM @ 12:30 September 22, 1991 and the above described clean up procedure was discussed and verbally approved.
