

10. Surface Restoration Plan:

- A. After completion of drilling and/or completion operations all equipment and other materials not needed for operations will be removed. Pits will be filled and the location cleaned of all trash and junk to leave the wellsite in as aesthetically pleasing a condition as possible.
- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. If the proposed well is non-productive, all rehabilitation and/or vegetation requirements of the BLM will be accomplished as expeditiously as possible. All pits will be filled and leveled within 90 days after abandonment.

11. Other information:

- A. The topography is of rolling terrain with vegetation of sagebrush and native grass.
- B. Soil: The soils are clayey sand over caliche base.
- C. Flora and Fauna: The vegetation cover consists of prairie grasses and flowers. Wildlife in the area probably includes those typical of semi-arid desert land.
- D. Ponds and Streams: Salt lake approximately 3750' northwest of location.
- E. Residences and Other Structures: None
- F. Land Use: Grazing
- G. Surface Ownership: The proposed location and access road are on Federally owned surface.
- H. An archaeological study has been conducted for the location and new access road. The report has been submitted separately.
