13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all sections and zones pertinent to this work.)

On 7/12/94, we began recompleting this well. We set a RBP over the exiting perfs and perforated the Upper Brushy Canyon "D" and "E" from 7084' - 7098', 7060' - 7062', 7046' - 7054' and 7026' - 7028' (17 holes). The perfs were acidized with 1500 gals 7 1/2% NEPE acid + 30 ball sealers and fraced with 12,516 gals gelled 2% KCl water + 35,280# 16/30 sand (included 5880# resin coated sand). We pulled the RBP and co-mingled the production. The well is currently on pump to the battery.
