

- E. Cattleguards, grates or fence cuts will be built, as necessary (refer to Exhibit #3-A).
- F. Turnouts will be built, as necessary (refer to Exhibit #3-A).

3. Location of Existing Wells:

Exhibit #4 shows all existing wells within a one-mile radius of the proposed Todd "27" Federal #1. There are 4 producing Delaware oil wells, 5 inactive Delaware oil wells, 3 drilled and abandoned wells, 1 producing Atoka gas well, 1 producing Morrow gas well and 1 Delaware injection well. A list of the wells is depicted on Exhibit #4 attachment.

4. Location of Existing and/or Proposed Facilities:

- A. Devon Energy Corporation does not operate production facilities on this lease in Section 27.
- B. In the event the well is found productive, the probable production equipment will be as follows:
 - a. If approved, production facilities as outlined on Exhibit #5 will be built in the southeast quarter of Section 27. This facility will have three or four 500 barrel oil tanks.
 - b. The tank battery, all connections and all lines will adhere to API standards.
 - c. The well will be operated by means of a gas driven prime mover. No power will be required.
