

Loc 2, 3, 6 + 8 are clearly OK by my reading.
They are in the IMC lease area and require
notice. However, they are not in LMR or
Buffer zone per map submitted to me
in January 1992.

Loc. 4 & 5 are not in LMR but are narrowly
within $\frac{1}{2}$ mi buffer. These would require
approval from potash lessee. # 4 is almost
too close to call.
