12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Upon the OCD's approval, we plan to perforate the Lower Cherry Canyon zone from 6734'-6752' (4" casing gun, 1 spf, 19 total holes). The new perfs will be acidized with 2500 gals NEFE HCl acid + 40 ball sealers. If the well is sufficiently productive after the acid job, we will put the well on pump. If not, we will frac the perfs with 17,200 gals gelled KCl water + 22,000 lbs 16/30 sand and 8000 lbs 16/30 resin coated sand. The well will be flowed back immediately following the frac for forced closure. Following flow back, we will clean out any sand and put the well on pump. We plan to pull the retrievable bridge plug (@ 6900') and commingle the Lower Brushy Canyon "D", Upper Brushy Canyon "C" and Lower Cherry Canyon "E" zones.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
