13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

On March 26, 1993, the BLM office in Santa Fe approved our APD for this well. Upon receiving a copy of your approval, The State of New Mexico Oil Conservation Office ruled that this was a "Non-Standard Location". They are requiring us to submit a federal sundry notice stating why the well was staked in this location.

We chose this location in an effort to comply with the "drilling pad" rule the BLM has which allows an operator to stake a well within 150' of an existing well. The location we staked, was recommended by the Santa Fe BLM office as an alternative location to those that were staked and denied in Section 23 that fell within the Potash area.

In compliance with the OCD approval process, we are notifying offset operators of this location. Also, we will supply the OCD with copies of the letters denying our other locations in Section 23. These letters offer the "drilling pad" as an option in choosing an alternative location.
