13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is discontinuously drilled, give subsurface locations and measured and true vertical depths for all sections and zones pertinent to this work.)

On 7/5/94, we began perforating this well. We set a RBP over the existing perfs and perforated the Upper Brushy Canyon "E" from 7020' - 7036', 7008' - 7014' and 7000' - 7004' (16 holes). The perfs were acidized with 1500 gals 7 1/2% HCl acid + 30 ball sealers and fraced with 10,000 gals gelled 2% KCl water + 22,000 lbs 16/30 sand (included 4000 lbs resin coated sand). We pulled the RBP and co-mingled production. The well is currently on pump to the battery.
