13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

On 10/13/93, we selectively perforated the Lower Brushy Canyon from 8056'-8252' (27 holes). On 10/15/93, we acidized the new perfs with 2000 gals 15% NEFE acid + ball sealers. Following the acid job, we pulled the 2 7/8" tubing and fraced the perfs via 5 1/2" casing with 60,500 gals gelled 2% KCl water + 200,540 lbs 16/30 sand. The well was opened for forced closure immediately following the frac. Currently, the well is on pump and testing. We are waiting for BLM approval to lay a temporary gas line.
