- ☒ Change of Plans
☐ New Construction
☐ Non-Routine Fracturing
☐ Water Shut-Off
☐ Conversion to Injection
☐ Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Santa Fe Energy Operating Partners, L.P., respectfully requests approval to move the location for the subject well from the currently approved location at 605' FSL & 1980' FEL to our original location at 330' FSL & 1980' FEL.

Our reasons for this request are as follows:

1. Move closer to the drilling island established by Enron to drill their directional gas well to Section 20 to the south. This same drilling island is proposed by Kaiser Francis to drill a directional oil well to the next Section 20.
2. Protect our correlative rights from offset drainage by locating as close as possible to the common lease line as is our wells No.s 6 and 11, on either side of this well.
3. The potash reserves around this proposed wellbore is not mineable due to the existing offset wellbores.
