Options:

During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which the well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in that well can be assigned increased allowables when authorized by the Division.

IS volumes must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60° F. Gravity base will be 0.60.
