13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

CONCHO RESOURCES INC. ACQUIRED THIS LEASE FROM PENWELL ENERGY INC. ON 2/1/99.

After reviewing the well file relative to the above well we have found that downhole commingling of the production began on 10/31/98. The well was shut in prior to the our purchase. We have isolated the Delaware formation and the Bone Spring formation and found that the Delaware is not producing any water, gas, or oil. We do not wish to abandon the Delaware perms but would like to continue producing the Bone Spring formation. Since the Delaware is not productive we will be allocatating 0% to this formation and 100% of the production to the Bone spring formation.

A plat (C-102) is attached showing the acreage dedication for this well. A plat is also included to show the offset operators.

A decline curve is also attached showing production from each zone. This production was prior to our purchase, and Penwell was producing each zone individually prior to commingling on 10/31/98.
