(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Mewbourne Oil Company requests altering the original well plan to utilize 3000 psi WP annular type blowout preventers while drilling the 12-1/4" intermediate hole. The original plan specified dual hydraulic blowout preventers in addition to the annular type. No records were found indicating incidents of abnormal pressure within the 2600' interval included within the intermediate hole in the immediate vicinity of this well.
