13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

The Operator wishes to amend the subject well's casing design as proposed in the previously approved APD. The Operator wishes to run only Special Drift, 40 ppf, L-80 casing instead of 40 and 43.5 ppf N-80 casing as previously approved. By doing this, the Operator can drill 8 3/4" hole out from under the 9 5/8" casing instead of 7 7/8" hole as previously approved. This will give the Operator much more flexibility should hole conditions warrant a protection string before TD is reached. The Operator plans to spud this well Wednesday so your timely verbal approval of this application is requested.
