

SURFACE USE AND OPERATING PLAN

Attachment to Form 3160-3
Devon Energy Corporation (Nevada)
TODD "13M" FEDERAL #31
710' FSL & 660' FWL
Section 13-T23S-R31E, Unit M
Eddy County, New Mexico

1. Existing Roads

- A. This location will be staked by John West Surveying, Co. of Hobbs, New Mexico and the well site and elevation plat for the proposed TODD "13M" FEDERAL #31 will be submitted as Exhibit #2.
- B. All roads into the location are depicted in Exhibit #3. New construction from the County road will be used to access the location. New construction will conform to the specifications outlined in item 2 below.
- C. Directions to location: Travel west-northwest from Jal, NM approximately 35 miles on State Highway 128 to County road 798, just into Eddy County from Lea County. Turn north (right) on 798 and travel approximately 4 miles on paved County Road 798, thence east (right) approximately 0.1 mile on existing lease road. Turn south (right) and continue on lease road approximately 0.2 mile to the existing Todd "13M" Federal #1 well pad and the proposed TODD "13M" FEDERAL #31 location.

2. Proposed Access Road

Exhibit #3 shows the existing entry road to the proposed TODD "13M" FEDERAL #31 location. If necessary any additional road construction will be as follows.

- A. The maximum width of the road will be fifteen (15) feet.
- B. It will be crowned and made of six (6) inches of rolled and compacted caliche. Water will be deflected, as necessary, to avoid accumulation and prevent surface erosion.
- C. Surface material will be native caliche. This material will be obtained from a BLM approved pit nearest in proximity to the location.
- D. The average grade will be approximately 1%.
