

of potable water. Expected remains, should they occur, should be of the isolated type.

Recommendations

NMAS recommends clearance for DEVON ENERGY CORPORATION's proposed Todd "26" Federal Well No. 13 and its access road and suggests that work-related activities proceed in accordance with company plans (Fig. 1). Clearance, of course, is granted by the Bureau of Land Management. If cultural resources are encountered during construction, the BLM and NMAS should be notified immediately. Duned settings are notorious for covering and uncovering cultural properties.

Todd "123" Federal Well No. 8

Location

The proposed location will measure 400 X 400 ft (actual area surveyed 4.44 acres) on federal land and will be situated 760 ft from the south line and 660 ft from the east line.
