13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Reference is made to Strata Production Company's (Strata) Nash Unit Well #33 Application for Permit to Drill, Deepen or Plug Back (APD) dated 8/25/02 and approved by New Mexico's Acting State Director on 10/8/2002.

In accordance with discussions between Mark Murphy of Strata Production Company and Steve Daly, Soil Conservationist and John Sherman, Wildlife Biologist of BLM's Carlsbad office, Strata's Proposed Mud System and related procedures and facilities as set forth in the APD and its attachments is hereby approved subject to the conditions set forth below. These conditions shall supercede the "closed mud system" requirement as stated in the Special Drilling Stipulations attached to the approved APD. The Reserve Pit Construction standards attached to the APD will apply. In addition Strata agrees to the following Special Stipulations:

1. Following drilling operations all pit(s) will be netted to protect wildlife.
2. The net and fluid level within any pit(s) will be monitored to insure that the net remains above any fluid in the pit(s).
3. Prior to pit reclamation Strata will notify BLM so that a representative may be present during pit reclamation activities.

14. I hereby certify that the foregoing is true and correct

Signed Kevin M. Britt
