Well No. 1 is located 1947 ft. from N line and 650 ft. from W line of sec. 14

Lot 3 (Sw. 1/4) Sec. 14 26 S 24 E N. 100 W.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Wildcat Lddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3083 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is planned to drill a cable tool test on the above location to a depth sufficient to test the Lower Delaware Sands, estimated to be approximately 3000'. About 100' of 10-3/4" casg. will be set at surface as a conductor string. Below this depth, 8-5/8" casing and 7" casing will be run as necessary to shut off fluids which may be encountered in the upper Delaware formation. If oil is encountered the well will be completed according to USGS specifications. If no oil is encountered the well will be plugged under USGS supervision.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
