(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Well No. 2 is located 330 ft. from N line and 330 ft. from E line of sec. 22

46 NW 1/4 Sec. 22 76 S 24 E N.M.P. 14  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

112003 24 112003  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3765 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

10" hole was drilled to a depth of 76' where 76'-8" of 8-5/8" = 28 lb casing was set as a conductor string. 8" hole was then drilled to a total depth of 707'. After shut-down at 672' for 3 days hole had 125' of sulphur water, bailed dry and drilled to 707' T.D. Hole did not make enough water with which to drill. Plugged hole from bottom to 600' with cuttings - cement 600-570. Shut down two days, ran bailer and no water on top plug. Acidized at 570' with 100 gal. = no oil or gas, completed plugging hole with cement and marker erected. Final report - Pulled all casing.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
