

Carl C. Von Elm

DRILLING SUPERVISOR

200 N. Ave. "A" — Phone 586-6512

KERMIT, TEXAS 79745

P-3 Meso Pet. Co.

- 9-22-62 (Cont.) Drilled 9781-9835' and well started kicking. Turned thru chokes. CI pr. Casing 525 $\frac{1}{2}$ " DP 300 $\frac{1}{2}$ ". Circulated out bubble. Increased weight of brackish water by adding 10 $\frac{1}{2}$ " brine until ave Wt. of system 9.2 $\frac{1}{2}$ " / gal. Lost time 12 $\frac{1}{2}$ Hrs.
- 9-24-62 Trip to chg bits at 9970'. No trouble passing window. Trip gas kicked 1- $\frac{1}{2}$ Hrs.
- 10-7-62: Reached T.D. 12,100' at 11:25 PM. Mud, Brackish Water 9.3 $\frac{1}{2}$ ".
- 10-8-62: I turned over the work I had been supervising in SE New Mexico to Mr. Kermit E. Elam and Then I proceeded to Farmington, N. Mexico to look after a drilling project on the Jicarilla Apache Indian reservation that was ready to start. For That reason, I do not have the details of cutting and pulling the 9-5/8" casing.

This is prepared solely for the purpose of correcting any incorrect or misleading information that I may have given you over the phone. I do not want or expect any pay for this. In fact it would jeopardize my amateur standing with the Social Security People if you tried it so: please do'nt.

Sincerely.....

Carl Von Elm
