August 20, 19 50

Welch Unit
Well No. 6 is located 2310 ft. from N line and 130 ft. from E line of sec. 17
NE/4 Section 17 26 S 27 E 100W
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Welch Delaware Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft. Not available at present.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to approximately 2300 feet in the Delaware Sand formation using rotary drilling equipment. Our casing program is as follows:

Drill 11" hole to approximately 230 feet where 8-5/8" 34# J-55 casing will be set using enough cement to circulate.

Drill out 7-7/8" hole below surface casing to Total Depth where 5-1/2" 15.30 J-55 casing will be set using approximately 200 sacks cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
