DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well is projected to the Castle Line approx. 900'. I propose to set 12 1/2" pipe to top of anhydrite at 75' and cement with 25 sacks. If necessary to run additional pipe, will advise.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
