The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

We propose to drill to a total depth of 4,000' to test the Delaware sand topped at approximately 3500'. We plan to set 9 5/8" 36# surface casing, cement circulated, and 5 1/2" 14# production string cemented with 200 sacks cement.

(Enclosed 6 copies - 2 to be returned to us)

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
