Re: Eddy AG A State #2-C,  
36-26-31, North Mason  
Delaware Pool

Gentlemen:

The enclosed Form C-103 on the subject well is being returned for some additional information. This form must be filed in triplicate with a detailed report thereon of all the work performed in converting this well to a salt water disposal well, further the conversion must comply with the provisions as set forth in Commission Order R-3693. Said order states in part that injection shall be accomplished through 2" tubing installed in a packer set at approximately 4100'. Further, the tubing shall be plastic-lined; the casing-tubing annulus shall be filled with an inert fluid; and that a pressure gauge shall be attached to the annulus at the surface in order to determine leakage in the casing, tubing or packer.

If you have any questions concerning this matter please feel free to call upon me.

Very truly yours,

OIL CONSERVATION COMMISSION

W. A. Gressett  
Supervisor, District II
