13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Texaco Exploration and Production Inc. respectfully submits it's plans concerning notice AJM-049-95.

Texaco requests an extended TA status for the above well. The following procedure to test casing and plug integrity was performed 3/31/95.

1. Notified BLM 24 hours in advance of work.
2. Tested casing and plug with 500 psi for 30 min. <held>. Test was witnessed by Andy Cortez of the BLM (4/5/95).
3. Classified well to TA status. The original pressure chart was sent to the NMOC and a copy can be found on the reverse side of this form.

Justification: A \$2,400,000 Cotton Draw 3D seismic acquisition was completed in early March of 1995. Texaco is currently processing the 3D survey. Texaco would like to hold the deeper Cotton Draw wells in TA status until the seismic data can be completely analyzed. The subject well successfully passed a casing integrity pressure test and presents no danger to the surrounding environment. A one year TA status time period should be sufficient to draw accurate conclusions from the 3D seismic work and present a plan to return this well to production.
