Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) *

The original plan to drill to the Devonian was altered due to the low structural position at T.D. of 7650'. The well was drilled to a total depth of 7650' and encountered a gas show from 7585' to 7594'. 12-3/4" 33# csg. was run to 417' and cemented with 425 sx. and 8-5/8" 24# was run to 690' and cemented with 500 sx. 5-1/2" 14, 15.5 & 17# casing was run to 7650' and cemented with 475 sx. on 1/1/72. Completion attempt was made in the Morrow from 7585' to 7594' on 1/19/72 and proved to be non commercial. The current plan is to attempt a Canyon completion after plugging back with a 100' cement plug above the Morrow perforations starting approximately 2/15/72.
