INSTRUCTIONS

[illegible]

If redacted prior to the time this act must be recorded in unredacted copies of all currently available laws (drillers, geologists, sample and core analysis, all types electric, etc.), formal attachments (e.g., maps, photographs, etc.) and/or State laws and regulations. All attachments shall be made available to the public upon request.

Figure 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for more details if required.

where z is the elevation of the point of observation above the datum, h is the height of the instrument above the point of observation, and d is the distance from the instrument to the point of observation. The elevation of the point of observation is given in other spaces on this form and in any attachments, (where not otherwise shown) for depth measurements.

Section 2.2.4 of the *Validation of Data for Regulatory Decision-Making* (FDA, 2002) states that “if the available data for a particular population are not sufficient to provide a statistically valid estimate of the true effect, the sponsor should not claim that the drug is safe and effective for that population.” (FDA, 2002, p. 22) The FDA also states that “if the available data for a particular population are not sufficient to provide a statistically valid estimate of the true effect, the sponsor should not claim that the drug is safe and effective for that population.” (FDA, 2002, p. 22) The FDA also states that “if the available data for a particular population are not sufficient to provide a statistically valid estimate of the true effect, the sponsor should not claim that the drug is safe and effective for that population.” (FDA, 2002, p. 22)
