17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

It is proposed to pull the tubing out of the above captioned well, check T.D. & run a cement bond log to check cement behind the pipe. If it is deemed necessary by the NMOCC the well will then be cement squeezed to shut off any potential hazards in regards to converting said well to a S.W.D. Tubing will be ran, packer set, 2% KCL water circulated behind the tubing & surface equipment installed to properly dispose of produced water.

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands. It is subject to the Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there is a local, area, or regional requirement, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for applicable requirements.

Item 17: It depends on the type of well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, on a per well basis, the following information should be included: (1) data on any former or present productive zones, or other zones with present significant fluid contents now sealed off by cement plugs; (2) method of placement of cement plugs; (3) mud or other material placed below, between and above plugs; (4) amount, size, method of packing of any casing, liner or tubing pulled and the depth to top of any bent in the hole; (5) method of closing top of well; and date well site conditioned for final inspection leading to approval of the abandonment.

CONVEYANCE OF PERSONAL PROPERTY
