Bill & Patsy Rich
c/o Oil & Gas Rpts & Serv.
P.O. Box 755
Hobbs, NM 88240

Dear Mr. Rich

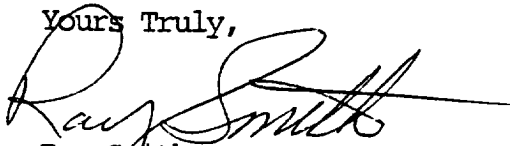

Upon reviewing the file on your Sulphate Sister SWD #1, Sec. 13, T-25S, R-26E Eddy County New Mexico, we find that the pressure limit on this well was increased from 457 PSI to 1500 PSI with the stipulation that a tracer survey be run every six months due to the relatively shallow depth at which this well is completed.

We are requesting that a tracer survey be scheduled as soon as possible because of the high injection pressure and that future tracer surveys be run every six months thereafter.

Please notify the Oil Conservation Division at least twenty four hours before the survey is to be run.

Attached is a copy of Mr. Ramey's letter of September 29, 1980 directing this survey to be done .

Yours Truly,

Ray Smith
Oil & Gas Inspector

*Tracer Survey run
Aug 4, 1994. Witnessed
by Ray Smith.*
