

Details of bop test

Midwest Oil Corporation

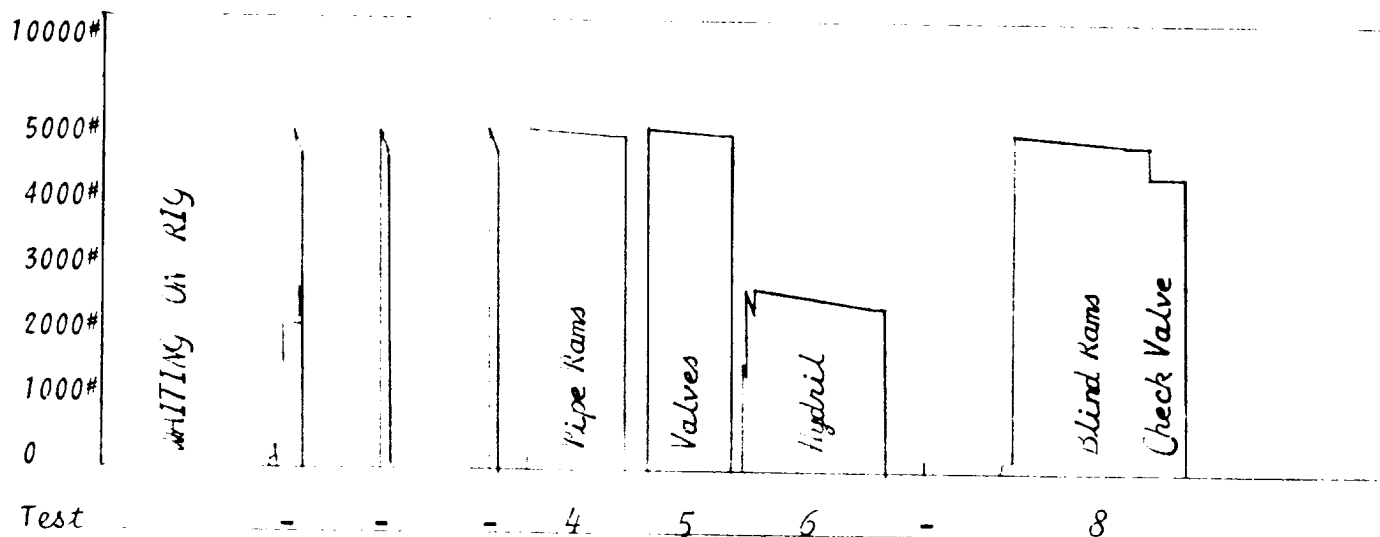

Target Unit #1

2/11/74

Contractor: Warton Drlg. Rig 3

Test by Yellow Jacket Tools and Services, Inc.

=====Transposition of the pressure recorder chart=====

The above is a transposition of the pressure recorder chart covering test to the blowout control equipment in service on your well drilling in the White City, New Mexico Area, Midland District, Texas. Test was made with test plug landed in casing head with the following test results:

Arrived location - rig nipping up.

Waiting on rig.

TESTING: Pipe Rams with all outside valves closed off stack - pressure applied down drill pipe.

Test #1 Pressured to 500# and released air; repressured to 2000# with loss of pressure; repressured to 5000# with leak to flange between spacer spool and casing spool. Tightened.

Test #2 Repeated test. Pressured to 5000# with leak to flange between blind rams bop and spacer spool. Tightened.

Test #3 Repeated test. Pressured to 5000# with same leak. Tightened.
