17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

It is our intention to reinstate the application to drill on the above referenced location that was previously approved July 12, 1974. We propose to drill a 9" hole to approximately 500' at which time 7" casing will be run and cement circulated to surface. After WOC a minimum of 18 hours, the surface casing will be pressure tested to 1000 PSI. If test OK will drill a 6 1/4" hole with Delaware formation water to TD. A double Ram BOP 3000# will be used while drilling this interval. At total depth, if well appears productive, the 4 1/2" casing will be run with cement sufficient to return approximately 100 feet into the casing.

18. I hereby certify that the foregoing is true and correct
