

7. METHODS FOR HANDLING WASTE DISPOSAL

All garbage and trash will be burned, buried and/or hauled from the well site. A portable chemical toilet will be supplied for human waste.

8. ANCILLARY FACILITIES

There are no ancillary facilities planned for this location.

9. WELL SITE LAYOUT

See attached location layout plat.

10. PLANS FOR RESTORATION OF THE SURFACE

When all activities have been completed, the location site and access road will be reshaped to the original contour. The reserve pit shall be filled and shaped to its original contour after pits have dried sufficiently to permit equipment operation.

Restoration activities shall begin within 90 days after drilling and testing activities cease, and will be completed within 30 days from that date.

11. OTHER INFORMATION

The well site falls on a gentle north slope, and falls in scrub mesquite, rabbit brush and sparse grass. The soil is a sandy loam. The well location site and all new road fall on Federal land.

Upon completion of the drilling of this well, it is proposed to run vibrator tests at points 300 feet, 5000 feet, 10,000 feet and 15,000 feet east of the well and one 5000 feet west. These vibrator spots will fall in the following Sections:

1. 300 ft. east Section 15 T25S, R29E
2. 5000 ft. east Section 14 T25S, R29E
3. 10,000 ft. east Section 13 T25S, R29E
4. 15,000 ft. east Section 18 T25S, R30E
5. 5000 ft west Section 16 T25S, R29E

All of the above land is Federally owned except Section 16 which is owned by the State of New Mexico.
