

MULTI-POINT SURFACE USE AND OPERATIONS PLAN

Florida Exploration Company
ROSS DRAW NO. 10
1980' FNL and 660' FWL
Section 27, T-26-S, R-30-E
Eddy County, New Mexico

RECEIVED

NOV 17 1980

U.S. GEOLOGICAL SURVEY
ALBUQUERQUE, NEW MEXICO

This plan is submitted with Form 9-331-C, Application for Permit to Drill, covering the above described well. The purpose of this plan is to describe the location of the proposed well, the proposed construction activities and operations plan, the magnitude of necessary surface disturbance involved and the procedures to be followed in rehabilitating the surface after completion of the operations, so that a complete appraisal can be made of the environmental effects associated with the operation.

1. EXISTING ROADS:

- A. Exhibit "A" is an up to date land plat showing existing access roads. Exhibit "B" is a portion of a USGS topographic map of the area on a scale of approximately 1 inch to 4000', showing the location of the proposed wellsite and roads in the vicinity. The proposed location is situated approximately 13 miles southwest of Malaga, New Mexico, via the access route shown in green.

DIRECTIONS:

1. Turn off of Orla-Jal cutoff at Marathon camp at Mason Field, proceed north - northwest for three (3) miles
2. Turn left (west) along old pipeline row road for six (6) miles
3. Turn right (north) toward #5 well - Location $\frac{1}{4}$ mile northwest of #5 well.

2. PLANNED ACCESS ROAD:

- A. The proposed new access will be approximately $\frac{1}{4}$ mile in length from point of origin to the edge of the drilling pad. The road will lie in a northwest to southeast direction.
- B. The new road will be 12 feet in width (driving surface).
- C. The new road will be covered with the necessary depth of caliche. The surface will be crowned, with drainage on both sides. No turn-outs will be necessary.
- D. The center line of the new road has been staked and flagged and the route of the road is clearly visible.
