17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Subject well was completed effective 7-8-81 as a producing oil well in the Bone Spring formation from perforations 6412'-7890'. It is now shut in pending installation of compressor facilities and a gas line to transport casinghead gas to El Paso Natural Gas Company's main transmission line. HCW Exploration hereby files a notice of intention to do remedial work on subject well. Plans are to set a retrievable bridge plug above top of existing perforations (6412'-7890'), and perforate additional holes in the Bone Spring formation from 6241' - 6382'. The new perforations will be acidized and fractured if necessary and then evaluated by flowing or swabbing for potential production.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
