MOORE STATE # 1, UNIT-G, 23-24-27, EDDY COUNTY, NEW MEXICO

This is in reference to your letter dated September 8, 1981,  
concerning the above listed well.

The 13 3/8" casing and BOP's were tested to 500 psi. The WOC  
time on the 13 3/8" cement job was 39 hours.

The 8 5/8" casing and BOP's were tested to 1500 psi. The WOC  
time on the 8 5/8" cement job was 24 hours.

My apologies for any problems that my error of omission may  
have caused you. We'll do better on the 4 1/2" casing report.

Please let me know if additional information is needed.

Sincerely,

Tom E. Moore
