PLUG AND ABANDON REQUIREMENTS - WAYNE MOORE - AZTEC STATE #1 -
SECTION 2 - T26S - R27E, EDDY COUNTY, NEW MEXICO.

Mr. Clements, Please find enclosed the C-105 for the above captioned well. It is my understanding that the C-105 and the notarized deviation survey are the two remaining requirements prior to plugging approval.

Three D Drilling Company, the drilling contractor on this well, went out of business before supplying us with a notarized deviation survey, thus we request that you waive the deviation survey requirement, and allow us to plug the well, as all other requirements for plugging approval have been satisfied.

Thank you for your help.

Sincerely,

Tom E. Moore
