Re: Gas well Shut In Pressure Report; Wayne Moore - Delaware River Unit #1;
Sec. 10 T26S R28E; Eddy County, New Mexico

Mr. Stamets:

This is in reply to delinquent test report dated April 16, 1986 on the above captioned well. The Delaware River Unit #1 has been shut in since August 1985 due to the market situation and the economics of producing this well. With this in mind, we request that this required Shut In Pressure Report be delayed until such time as this well is put back on production. Economics do not, at this time, justify spending needless dollars for this test. Thank you for your help with this request, and we will await your reply.

Sincerely,

Tom E. Moore
